

**FOR IMMEDIATE RELEASE**

**DREDGING SUPPLY COMPANY'S 2006 LIST OF ACHIEVEMENTS**

**RESERVE, LA (July 24, 2006)** – Each year DSC progressively builds more dredges and their manufacturing facility continually expands to accommodate the heavy workload. With 2006 already labeled as a record-breaking year for the family-owned company, DSC carries on accepting orders as delivery dates extend late into 2007. "We have been quite fortunate to attain stable growth each year. As DSC continues to develop, we strive to uphold our commitment to keep our customers at the forefront of our business, adds William Wetta – President/CEO. DSC believes their rising reputation for high quality equipment, coupled with successful deliveries has contributed to their thriving growth.

DSC has also noticed an increase in global sales. With two orders currently under construction for the U.A.E. and one preparing for shipment to Nigeria, the company feels its internationally known reputation is stronger than ever. Better Dredges' recent acquisition of W&S Dredge will also enable worldwide growth as exports are seemingly increasing for smaller dredges.

DSC has always maintained a hands-on, service oriented philosophy. In today's market, buyers are looking for a long-term relationship and are attracted to DSC's value of delivering service after the sale. "We are thrilled with the successful start of 2006 and hope the second half of the year will continue to do as well", says Bob Wetta – Vice President Marketing/Sales.

DSC is proud to announce the following accomplishments that have transpired to date in 2006.
